COORDINATING COMMITTEE

MEMORANDUM BY THE UNITED STATES DELEGATION

Concerning

EXPORT OF TEFLON INSULATING TAPE TO POLAND

6 12

1. The United States authorities have been requested to approve the export to Poland of 14,724 yards of Teflon insulating tape valued at \$1,690 and 1 gallon of Teflon primer valued at \$65. These items are covered by Item 6 of the Atomic Energy List.
2. These materials would be consigned to CIECH, Warsaw, through C. Hartwig, Gdynia, for use in the Gliwickie plants of Poland. They would be used for synthetic materials for the production of packing and special wrapping against corrosive substances. The Polish Government has provided assurances that this material will not be transshipped or re-exported, and based upon United States experience, the United States authorities believe that the quantity involved is reasonable for the stated end-use.
3. The United States Delegation submits this request on an ad hoc basis, and would appreciate receiving the views of Member Governments at an early date.
